PROFILE

After graduating with a Masters degree in Business & Management, for the last 8 years, I have enjoyed working in creative industries and customer facing environments; such as telecommunications and beauty, where I have developed exceptional communication skills and customer centric approach. Recently graduated from an extensive Web Developer bootcamp where I build user-centric solutions and have received plaudits for both my front-end and back-end work on two successful Ruby on Rails apps. I use all my experience to work effectively and efficiently and looking forward to combining my existing skills with my new technical skills.

EDUCATION

| | | |
|---------------------|---|---------------|
| Jul 2022 – Dec 2022 | Web Developer, Le Wagon <ul style="list-style-type: none">• Le Wagon - A 6 month intensive course during which enabled me to learned the fundamental skills required to become a web developer such as:• Programming foundations, how to write robust code with object-oriented programming and build MVC software from scratch.
